PRESS RELEASE

WIND HELLAS SELECTS iBASIS FOR MULTISERVICE IPX TO SCALE 4G ROAMING

April 8, 2019, Lexington, MA – iBASIS, the leading communications solutions provider enabling operators and digital players worldwide, announces that Wind Hellas, one of the largest telecommunications companies in Greece, has connected to the iBasis IPX network to leverage its full, secure and scalable roaming solution. This includes LTE signaling (Diameter/S6) and LTE Data Roaming traffic (GRX/S8), to enable Wind Hellas to scale and enhance its 4G roaming services for roaming Summer spikes.

Through the iBASIS multiservice IPX network, Wind Hellas gains immediate access to iBASIS' LTE Roaming footprint of more than 660 networks in 180 countries, which represents 1.5 billion subscribers reached via iBASIS' direct routes. The move enables a high quality roaming experience for all roamers, especially inbound, given the popularity of Greece as a holiday destination.

With the end of roaming charges in Greece two years ago, subscribers are taking advantage of the new Roam Like Home rules, consequently boosting the demand in roaming services. Greece, one of the four top Mediterranean destinations for travelers, drives inbound roaming revenues contributing to the impressive roaming growth in the country.

"To strengthen our leading position in Greece and fully exploit our newly upgraded 4G/4G+ network covering ~95% population, we strive to provide our subscribers and visitors with superior quality and speed, wherever they are from," said Vassilis Gkatsos, Head of Carrier & Wholesale Services at Wind Hellas. *"iBASIS is a very reliable partner to ensure our service is high quality, offering a fully integrated solution for LTE roaming with redundancy. iBASIS enables us to manage the spikes in roaming usage and better anticipate traffic growth and its associated revenues and costs."*

"Working closely with Wind Hellas, we are able to offer the broadest LTE roaming reach and quality in a cost-effective manner. It better equips them to maximize roaming revenues," said Alexandre Pebereau, iBASIS CEO. *"As an innovative mobile operator, Wind Hellas is taking steps to ensure that it continues to deliver the highest quality services for its customers. We're thrilled to partner and to help leverage our IPX network and LTE Roaming solution to achieve their goals."*
